No. 1—6

Progress in Materials Analysis, Vol. 3

Proceedings of the 13th Colloquium on Metallurgical Analysis, Vienna, May 25—27, 1987

M. Grasserbauer, W. Wegscheider (eds.)

Editorial. *W. Wegscheider* 1
Preface. *M. Grasserbauer* 3
High-Temperature Resistant Materials and Structural Ceramics for Use in High-Temperature Reactor and Fusion Reactor Plants—Requirements for Modern Physico-Chemical Analysis. *H. Nickel* . 5
High Temperature Corrosion Behaviour of M(Co, Ni)CrAlY-Coatings on High Temperature Materials—Microanalytical Investigations. *V. Thien, W. Voss* 49
Mikroprobe Analysis of Reaction Products of Titanium and Niobium with Tungsten. *U. Zwicker, J. Breme, K. Nigge* 71
Depth Profiling in Surface Regions of Oxidized Metal Alloys by Low Energy PIXE. *V. Drüke, R. Hecker, D. Stöver* 85
Analytical Electron Microscopy of Materials. *J. Heydenreich, W. Rechner* 93
Metallurgical Factors Determining the Coercivity of Nd-Fe-B Magnets. *J. Fidler, P. Skalicky* 115
Application of EELS to the Microanalysis of Materials. *F. Hofer, P. Warbichler* 125
Further Development of Microarea Analysis Techniques for Determining Nitrogen in Steels.
I. Overview. *S. Baumgartl, A. R. Büchner, W.-G. Burchard, H.-J. Dudek, E. N. Haeussler, H. Hantsche, P. Karduck, M. Liphardt, H. Pries, W. Rehbach, P. von Rosenstiel, D. Schalkoord, E. Schauf, P. Schwaab, H. Vetters* 135
II. Comparison and Use of Different Microarea Analysis Techniques. *S. Baumgartl* 137

III. Quantitative Electron Probe Microanalysis of Nitrogen in Steel. *S. Baumgartl, A. R. Büchner, W.-G. Burchard, E. N. Haeussler, P. Karduck, M. Liphardt, H. Pries, W. Rehbach, D. Schalkoord, E. Schauf, P. Schwaab, H. Vetters* 140
IV. Modification of the Wedge-Specimen-Correction for Quantitative EPMA of N in Steel. *A. R. Büchner* 142
V. Auger Electron Microanalysis of Nitrogen in Steels. *H. J. Dudek, H. Hantsche* 143
VI. Quantitative AES in Steels. *H. Hantsche, H. J. Dudek* 145
VII. Standard Specimens for Microanalysis of Nitrogen in Steel. *D. Schalkoord, W. Rehbach, E. Schauf, P. Schwaab* 148
Process Analysis in Steelmaking and Steel Processing. *K. H. Koch* . . . 151
Synergetic Effects During Sputter-Assisted Depth Profiling: Growth-Dominated Topography Development on InP and a Model of the Atomic Mechanism. *W. H. Gries, K. Miethe* 169
Surface Analysis of a Glass Leached with Stable Isotopes. *G. H. Frischat, Th. Richter, G. Borchardt, S. Scherrer* 179
Quantitative Trace Analysis with X-Ray Fluorescence in the Scanning Electron Microscope. *R. Eckert* 193
The Analysis of Carbide and Intermetallic Phase γ' Isolates in Nickel Alloys by Means of Injection Method of Flame Atomic Absorption Spectrometry. *A. Wyciślik* 201
Investigations in the Ternary System Ti-Mo-N by Means of EPMA and XRD. *W. Lengauer, H.-J. Ullrich, P. Ettmayer* 211
A Decoration Technique for Defect Analysis in Ceramics. *O. Buresch, F. E. Buresch, W. Hönle, H. G. v. Schnering* 219
Electron Microprobe Analysis of Micro Amount Powder Samples: A Case Study on High Purity Coal. *K. Honegger, W. Wintsch* 225
High Performance Analytical Characterization of Refractory Metals. *H. M. Ortner, W. Blödorn, G. Friedbacher, M. Grasserbauer, V. Krivan, A. Virag, P. Wilhartitz, G. Wünsch* 233
Multi-Element Trace Analysis of Tungsten. *V. Scherer, D. Hirschfeld* . . 261
Characterization of High Purity Gallium. *G. Kudermann, K.-H. Blaufuß* 269
Glow Discharge Mass Spectrometry—A Powerful Technique for the Elemental Analysis of Solids. *N. E. Sanderson, E. Hall, J. Clark, P. Charalambous, D. Hall* 275
Ultra Trace Analysis of Refractory Metals by Solid State Mass Spectrometry—A Comparison of GDMS, SSMS and SIMS.
I. Concept and Comprehensive Evaluation. *M. Grasserbauer* . . 291
II. High Resolution Glow Discharge Mass Spectrometry. *P. M. Charalambous* 295
III. Glow Discharge Mass Spectrometry at Low Resolution. *N. Jakubowski, D. Stuewer, W. Vieth* 302
IV. Spark Source Mass Spectrometry. *H. E. Beske* 309
V. Secondary Ion Mass Spectrometry. *A. Virag, G. Friedbacher* . . 313
High Resolution Auger Electron Spectroscopy for Materials Characterization. *S. Hofmann* 321

Simultaneous SIMS/AES Measurements for the Characterization of Multilayer Systems. *K. Maßeli, J. Burbach, R. Kassing, W. Kulisch, L. Niewöhner* 347
Investigations on Hopeite- and Phosphophyllite-Containing Phosphate Coatings on Steel. *H. Bubert, H. Pulm, H. Puderbach* 355
XPS and SIMS Investigations on Plasma-Treated Glass Surfaces. *J. Bartella, H. Grünwald, U. Herwig* 365
SDS 800—The New Data System for Quantitative Depth Profiling of Inhomogeneous Samples by SIMS. *S. M. Daiser, H. Frenzel, J. L. Maul, C. Scholze* 371
The Detection of Oxygen in Magneto-Optical Layers with SIMS. *H. J. Tolle, H. Heitmann* 379
SIMS Yields from Glasses; Secondary Ion Energy Dependence and Mass Fractionation. *E. U. Engström, A. Lodding, H. Odelius, U. Södervall* 387
Characterization of Nitrided and Nitrocarburized Surface Compound Layers of Machine Parts with AES. *J. Pirš, A. Zalar* 401
Investigation on the Corrosion of Brazed Joints by Means of Scanning Auger Microprobe. *H. Jenett, W. Brandl, H. Bubert, H.-D. Steffens* . 409
AES Study of Underclad Cracking. *M. Koutník, V. Landa* 429
AES Investigations of Fracture Surfaces of Aluminium Doped Sintered Molybdenum Rods. *C. Setti* 437
Chemometrics for Material Analysis. *M. Otto* 445
Applications of Synchrotron Radiation in Materials Analysis. *B. Lengeler* 455
Distribution Analysis of Trace Elements in Low Alloy Steel by Means of EPMA, SIMS, and TEM. *P. Wilhartitz, W. Wintsch, M. Grasserbauer* 477
Application of Work Function Measurements to the Characterization of Thin Films and Solid Surfaces. *G. Bachmann, J. Scholtes, H. Oechsner* 489
SNMS-Analysis of Insulators. *J. F. Geiger, M. Kopnarski, H. Oechsner, H. Paulus* 497
